

Administering Medicines Policy

Date Agreed:	December 2026
Review Date:	December 2027
Type of Policy:	DCAT Statutory Policy

Statement of Intent

Section 100 of the Children and Families Act 2014 places a duty on governing bodies of maintained schools, proprietors of academies and management committees of PRUs to make arrangements for supporting pupils at their school & Nursery with medical conditions. The governing body of St Margaret's CE Primary School will ensure that these arrangements fulfil their statutory duties and follow guidance outlined in 'Supporting pupils at school with medical conditions' December 2015'.

Establishment staff do not have a statutory duty to give medicines or medical treatment. However, medicines will be administered to enable the inclusion of pupils with medical needs, promote regular attendance and minimise the impact on a pupil's ability to learn. In an emergency all teachers and other staff in charge of children have a common law duty of care to act for the health and safety of a child in their care – this might mean giving medicines or medical care.

St Margaret's C of E Primary School

The governing body will develop policies and procedures to ensure the medical needs of pupils at St Margaret's CE Primary School and Nursery are managed appropriately. They will be supported with the implementation of these arrangements by the Head teacher and school staff.

The lead for the management of medicines at St Margaret's CE Primary School is Lynda Busbridge or in their absence Nichola Rea. In their duties staff will be guided by their training, this policy and related procedures.

Implementation monitoring and review

All staff, governors, parents/carers and members of the St Margaret's CE Primary School & Nursery community will be made aware of and have access to this policy. This policy will be reviewed bi-annually and its implementation reviewed and as part of the Head teacher's annual report to Governors.

Insurance

Staff who follow the procedures outlined in this policy and who undertake tasks detailed in the RPA covered by the DCAT insurance.

Claims received in respect of medical procedures not covered by the insurers will be considered under the DCAT's insurance fund.

Prescription Medicines

Medicine should only be brought to school when it is essential to administer it during the school day. In the vast majority of cases, doses of medicine can be arranged around the school day thus avoiding the need for medicine in school. Antibiotics for example are usually taken three times a day, so can be given with breakfast, on getting home from school and then at bedtime.

Occasionally a GP may prescribe a medicine that has to be taken during the school day. Parents may call into the school and administer medicine to their child, or they may request that a member of school staff administers the medicine. When school staff administer medicines, the parent or guardian must supply the medicine in the original pharmacist's container clearly labelled including details of possible side effects to the school office and must complete a 'Parental agreement for setting to administer medicine' form (Appendix 1 Template B). On no account should a child come to school with medicine if he/she is unwell. Members of staff who administer medicines must have completed 'medicines in school & Nursery competency test'.

Non-prescription Medicines

Occasionally paracetamol will be administered to pupils age 10 and over suffering acute pain from things like migraine and period pain. The school keeps its own supply of standard paracetamol for administration to pupils over the age of 10.

- Parents must give written consent for the school staff to administer medication at the start of the school year or when their child joins the school
- Staff will check that the medicine has been administered without adverse effect to the child in the past and parents must certify this is the case – a note to this effect should be recorded on the consent form

- Only 1 standard dose (appropriate to age and weight of the pupil) can be administered in school per day.
- Verbal parental consent must be gained during the day to administer paracetamol between the start of school day and 12pm and again from 2pm and until the end of school day. If parents cannot be contacted then paracetamol cannot be administered.
- The school can administer paracetamol without parental consent on the day between 12pm and 2pm
- If paracetamol is administered at any time during the school day parents will be informed of the time of administration and dosage.
- The school will keep records of the administration of paracetamol as for prescribed medication.
- Pupils must not bring paracetamol (or other types of painkillers) to school for self-administration.

Paracetamol may be used as pain relief for children under the age of 10, if a GP/Consultant/Dentist/Nurse Practitioner/School Nurse has recommended its use and parental consent is gained. Circumstances that might warrant the use of pain relief in the under 10's include fracture, pre/post-operative toothache and post-operatively general surgery (this is not an exhaustive list). Details of the pupils condition and the requirement for on demand pain relief must be documented on the pupils IHC. In addition to the protocol for the administration of paracetamol detailed above the school will:

- Only administer paracetamol for a maximum of 1 week.
- The parent or guardian will supply daily a single dose of paracetamol for administration. This can be in the form of a tablet or liquid sachet.
- The requirement for pain relief will be regularly reviewed during the week; pain relief should not be given routinely each day. The review will be detailed on the pupils IHC.

The school will also administer non-prescription travel sickness medication and antihistamine (Piriton) for mild allergic reactions. All other non-prescription medication will not be administered at school and pupils should not bring them to school for self-administration. The majority of medication lasts 4-6 hours, therefore non-prescription medication can be administered at home prior to the start of the school day and it will last the duration of the school day. A parent or guardian may attend school to administer additional doses if necessary.

Antihistamine can only be administered where a GP/Consultant has recommended or prescribed antihistamine for the treatment of a mild allergic reaction (i.e. itchy eyes or skin, rash or/and redness of the skin or eyes,) The school can administer 1 standard dose of antihistamine (appropriate to age and weight of the pupil) and it is very important that symptoms are monitored for signs of further allergic reaction. During this time pupils must never be left alone and should be observed at all times. ***If symptoms develop or there are any signs of anaphylaxis or if there is any doubt regarding symptoms then an adrenaline auto injector should be administered without delay and an ambulance called.*** Piriton can cause drowsiness and therefore the school will consider if it is necessary for pupils to avoid any contact with equipment that might cause harm i.e. P.E. Science, Design and Technology.

Mild Allergic Reaction

Every effort will be made by the school to identify and reduce the potential hazards/ triggers that can cause an allergic reaction to pupils diagnosed with anaphylaxis within the school population. Antihistamine will be administered for mild reactions as detailed above.

Severe Allergic Reaction

An adrenaline auto injector should be used immediately in a severe reaction (see Pupils Individual Health Care Plan for details). If in doubt about the severity of an allergy reaction, administer the adrenaline auto injector and call an ambulance immediately

These non-prescription medications will be administered by staff providing they are supplied in the original packaging and accompanied by a 'Parental agreement for setting to administer medicine' form. Medication must be suitable for the pupil's age, supplied by the parent (not the school) and in its original packaging, with manufacturer's instructions. Staff will check that the medicine has been administered without adverse effect to the child in the past and parents must certify this is the case – a note to this effect should be recorded on the consent form. The use of antihistamine will be detailed on the pupils Individual Health Care Plan. The medication will be stored and administration recorded as for prescription medicines. The school will inform the parent / guardian the time and dose of the non-prescription medication that has been administered, at the end of each day.

Controlled Drugs

The school does not deem a pupil prescribed a controlled drug (as defined by the Misuse of Drugs Act 1971) as competent to carry the medication themselves. Controlled drugs will be stored securely in a non-portable container and only named staff will have access, controlled drugs for emergency use must also be easily accessible. The administration of a controlled drug will be witnessed by a second member of staff and records kept. In addition to the records required for the administration of any medication, a record will be kept of any doses used and the amount of controlled drug held in school.

Pupils with Long-term or Complex Medical Needs

Parents or carers should provide the head teacher with sufficient information about their child's medical condition and treatment or special care needed at school & Nursery. Arrangements can then be made, between the parents, head teacher, school nurse and other relevant health professionals to ensure that the pupil's medical needs are managed well during their time in school. For pupils with significant needs, arrangements will be documented in an Individual Healthcare Plan (IHP) or Educational Health and Care plan (EHC). These plans will be reviewed by the school & Nursery annually or following a significant change in a pupil's medical condition.

Admissions

When the school is notified of the admission of a pupil with medical needs the Lead for Managing Medicines will complete an assessment of the support required. This might include the development of an IHP and additional staff training. The school will endeavour to put arrangements in place to support that pupil as quickly as possible. However the

school may decide (based on risk assessment) to delay the admission of a pupil until sufficient arrangements can be put in place.

Pupils taking their own medication

For certain long-term medical conditions, it is important for children to learn how to self-administer their medication. Appropriate arrangements for medication should be agreed and documented in the pupil's individual health care plan and parents should complete the relevant section of 'Parental agreement for setting to administer medicine' form.

Staff Training

The school will ensure that the staff who administer medicine to control specific chronic conditions are trained to administer those specific medicines, for example, Anaphylaxis (adrenaline auto injector), Diabetes (insulin) Epilepsy (midazolam). Training in the administration of these specific medicines is arranged via the school nurse. A record of training must be maintained to show the date of training for each member of staff and when repeat or refresher training is required.

The school will also ensure that other staff who may occasionally need to administer a prescribed medicine supplied by the parent with a valid consent form and, or an IHP, are trained in the procedure adopted by the school by the person who has completed the Managing Medicines course. A record of training must be maintained to show the date of training for each member of staff and when repeat or refresher training is required.

The school will ensure that a record is made of every dose of medicine administered in school. This record is completed by the person that administers the medicine via the Medical Tracker.

Storage and Access to Medicines

All medicines apart from emergency medicines (inhalers, EpiPens, etc.) are kept in a locked store cupboard. Medicines are always stored in the original pharmacist's container. Pupils are told where their medication is stored and who holds the key and staff will be fully briefed on the procedures for obtaining the medication in an emergency.

Emergency medicines such as inhalers and adrenaline auto injector are either held by the pupil or kept in a clearly identified container in his/her classroom. The school will make an assessment as to the competency of each individual pupil to carry their own medication. Parents will be asked to supply a second adrenaline auto injector for each child and they will be kept in the Medical Room. Staff must ensure that emergency medication is readily available at all times i.e. during outside PE lessons, educational visits and in the event of an unforeseen emergency like a fire. In accordance with the Human Medicines (Amendment No 2) Regulations 2014 the school will keep a small supply of salbutamol inhalers for emergency use. Parental consent will be gained to administer the emergency school inhaler.

Medicines that require refrigeration are kept in the medical room fridge, clearly labelled and the fridge is locked at all times. All staff know that the key for the lock is kept in a high cupboard out of reach of the children.

Record Keeping

All staff and pupil accidents will be recorded on Medical Tracker.

Emergency Procedures

In a medical emergency, first aid is given, an ambulance is called and parents/carers are notified. Should an emergency situation occur to a pupil who has an IHP, the emergency procedures detailed on the plan are followed, and a copy of the IHP is given to the ambulance crew. IHP's will also be given to those companies and staff providing transportation of pupils to and from school, in order that the IHP can be passed to the ambulance crew in the event of an emergency. Instructions for calling an ambulance are displayed prominently by the telephone in the school office.

Medicines on Educational Visits

Staff will administer prescription medicines to pupils when required during educational visits. Parents should ensure they complete a consent form and to supply a sufficient supply of medication in its pharmacist's container. Non-prescription medicines (apart from travel sickness medication and antihistamine for mild allergic reaction) cannot be administered by staff and pupils must not carry them for self-administration.

Pupils with medical needs shall be included in educational visits as far as this is reasonably practicable. School staff will discuss any issues with parents and/or health professionals in suitable time so that extra measures (if appropriate) can be put in place for the visit.

All staff will be briefed about any emergency procedures needed with reference to pupils where needs are known and copies of care plans will be taken by the responsible person.

Medicines on Residential Visits

The school acknowledges the common law 'duty of care' to act like any prudent parent. This extends to the administration of medicines and taking action in an emergency, according to the care plan.

Occasionally it may be necessary to administer non-prescription medicines i.e. paracetamol, anti-histamine etc. to pupils suffering acute pain from things like migraine, period pain, toothache. Parents must give written consent prior to the residential visit using a, 'Parental agreement for setting to administer medicine' form (Appendix 1 Template B) before non-prescription medication can be given. Staff will check that the medicine has been administered without adverse effect to the child in the past and parents must certify this is the case – a note to this effect should be recorded on the consent form.

The school will keep its own supply of standard paracetamol tablets and liquid suspension for administration to pupils during a residential visit and parental consent will be required in order for the school to administer the supply. The medication will be stored and administration recorded as for prescription medicines. Pupils should not bring paracetamol (or other types of painkillers) on the residential visit for self-administration.

Travelling Abroad

Children with medical needs will be encouraged to take part in visits. The responsible member of staff will carry out a specific and additional risk assessment and a care plan will

be drawn up considering parental and medical advice. Best practice would be to translate these documents to the language of the country being visited. The international emergency number should be on the care plan (112 is the EU number). **UK Global Health Insurance Card (Ghic)** should be applied for by parents and supplied to the school prior to travel for all pupils that travel abroad.

Complaints

Issuing arising from the medical treatment of a pupil whilst in school should in the first instance be directed to the Head teacher. If the issue cannot easily be resolved the Head teacher will inform the governing body who will seek resolution.
